ReWired
Brent Mason Overdrive & Distortion
Quick Reference Guide

Our most advanced version of the Brent Mason Signature Dual Overdrive and Distortion is a true workhorse of a pedal, built to the tonal specifications of a Nashville Legend!

Order Switch: Change direction of channels when connected for single I/O operation.

Level: Controls the total output volume. Turning clockwise increases volume.

Gain: Adjusts the total amount of gain that is applied, turning clockwise increases gain.

Fat: Adds a fat low end characteristic to your tone, turning clockwise increases.

Tone: Adjust the amount of high-end frequencies, turning clockwise will increase the levels, counter-clockwise to decrease.

Blend (Overdrive Only) : Adjusts the blend of distorted and clean signal. Turning clockwise adds clean and lowers distorted signal mix.

Single I/O

Order Switch sets direction of effect chain internally (no cable re-routing needed)

Split Channels

Both Overdrive and Distortion channels can be connected as independent effects

Fig.1 Connecting your pedal

Power: This pedal was designed around the usage of a 9-18V DC power source. To avoid damage to the pedal, do not exceed 18V DC, do not use center pin positive adapters, and do not use AC power. Use only a 9-18V DC power source that is intended for guitar pedals.

This pedal draws approximately 35mA at 9V and 40mA at 18V.

“Many dont know this, but before Brian and Brent knew each other Brian was a huge fan of Brent’s music and named one of his children after Brent. This became a little awkward after they got to know each other well...”

Tips ‘n’ Tricks:

- Each channel can be connected independently, which is especially useful if you’re using a switching system or want to place something between the channels, such as a compressor or EQ pedal.
- By setting each channel to lower gain, you can create unique tonal textures by blending the two. The channel order switch lets you choose which effect comes first in the signal chain for further versatility.
- Brent uses the Fat controls on both sides to achieve a tone similar to that of a 4x12 cab.
- He frequently uses the right channel, even for cleaner tones, adjusting the Blend control to add that perfect touch of grit.

Some of Brent and Brian's suggested settings - use these as a starting point to find your perfect tone.

Brent's Screaming Rides / Heavy Power Chords

"Use this to simulate the thump of a 412 cab. Dial the low end to taste."

Brent's Signature Rhythm Crunch

"This is the perfect setting for a Tweed Deluxe crunch"

Brian's "Edge of Breakup"

"Great base tone for that classic tube amp sound"

Brian's "Secret Sauce-y" Lead tone

"This pedal isn't messing around - it can get real gnarly when pushed"

WAMPLER Pedals Limited Warranty.

WAMPLER offers a 5 year warranty to the original purchaser that this WAMPLER product will be free from defects in material and workmanship. A dated sales receipt will establish coverage under this warranty. This warranty does not cover service or parts to repair damage caused by accident, neglect, normal cosmetic wear, disaster, misuse, abuse, negligence, inadequate packing or shipping procedures and service, repair or modifications to the product, which have not been authorized by WAMPLER. If this product is defective in materials or workmanship as warranted above, your sole remedy shall be repair replacement as provided below.

RETURN PROCEDURES In the unlikely event that a defect should occur, follow the procedure outlined below. Defective products must be shipped, together with a dated sales receipt, freight pre-paid and insured directly to WAMPLER SERVICE DEPT – 5300 Harbor Street, Commerce, CA 90040, USA. A Return Authorization Number must be obtained from our

Customer Service Department prior to shipping the product. Products must be shipped in their original packaging or its equivalent; in any case, the risk of loss or damage in transit is to be borne by the purchaser. The Returns Authorization Number must appear in large print directly below the shipping address. Always include a brief description of the defect, along with your correct return address and telephone number. When emailing to enquire about a returned product, always refer to the Return Authorization Number. If WAMPLER determines that the unit was defective in materials or workmanship at any time during the warranty period, WAMPLER has the option of repairing or replacing the product at no additional charge, except as set forth below. All replaced parts become a property of WAMPLER. Products replaced or repaired under this warranty will be returned via ground shipping within the United States freight prepaid. WAMPLER is not responsible for costs associated with expedited shipping, either to WAMPLER or the return of the product to the customer.

INCIDENTAL OR CONSEQUENTIAL DAMAGE In no event is WAMPLER liable for any incident or consequential damages arising out of the use or inability of the possibility of such damages, or any other claim by any other party. Some states do not allow the seclusion or limitation of consequential damages, so the above limitation and exclusion may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantees that interference will not occur in a particular installation. If this

equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experience radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty to operate the equipment.

FOR YOUR PROTECTION Please complete the online warranty registration within (10) ten days of the date of purchase so that we may contact you directly in the event of a safety notification issued in accordance with the 1972 Consumer Product Safety Act.
